Included mods

Dolly	v1.1
Goosneck	v2.0
Lowboy	v2.0
Lowboy short	v2.0

Contents

In this manual you find information on how to operate all features that the included mods have.

Goosneck

Attach to truck   3.1

The simplest way to attach Lowboy is to use the "Lock/Unlock goos to truck" function and what this does is that it locks attacher joint on goosneck straight backwards and stays that way until its deactivated.
There are two ways to deactivate this function and the first is to deactivate by pressing the O button and the other is to attach lowboy.

To activate "attach to truck": Press **O**, (Gamepad) **Button 5 + Button 6**
To deactivate "attach to truck": Buttons above or attach Lowboy

Lock Lowboy   3.2

To be able to lift and lower goosneck then you will have to lock lowboy by pressing B button.

To activate/deactivate "Lock/Unlock": Press **B**, (Gamepad) **Button 2**

Lift and Lower   3.3

Lift and lower cant be used if lowboy is attached and lock for lowboy isent activated.
This function works like a frontloader on tractors what I mean with that is that it use the same buttons.

To lift: Press **J**, **Left Mouse Click and Move UP**
To lower: Press **N**, **Left Mouse Click and Move DOWN**

Icons   3.3

These indicates when each of the functions its connected to is activated.

1. Indicates when "Attach to truck" is activated.
2. Indicates when you have lifted lowboy high enough to transport, warnings also stops.

3. Indicates when "Lock Lowboy" is activated.

Lowboy and Lowboy short

Lock and Unlock load   4.1

To lock load you can attach goosneck to lowboy and deattach to unlock or you can use the a button to lock load.

To lock/unlock load: Press **Z**, (Gamepad) **Button 5 + Button 12**

Note:
It will unlock when you leave the vehicle that is attached to goosneck.

Steering Modes   4.2

Steering mode allowes you to swith between None, Auto, Manual but more on them later.
Its only allowed to change steering mode when wheels are center.

To change steering mode: Press **DELETE**, (Gamepad) **Button 7 + Button 12**

None steering (wheel axles)   4.3

This is the only Steering mode that allowes wheel axles to be lifted.

To lift/lower: Press **V**, (Gamepad) **Button 12**

Auto steering   4.4

This steering mode add auto steering to wheels when activated.

Manual steering   4.5

This steering mode adds manual steering to wheels when activated.
Its use the same buttons as frontloaders tool function.

To turn left: Press **K**, **Left Mouse Click and Move LEFT**
To turn right: Press **M**, **Left Mouse Click and Move RIGHT**

## Widen load space   4.6

This can be used when tranporting wider vehicles.

To fold/unfold load space: Press **X**, (Gamepad) **Button 5**

Icons   4.7

These indicates when each of the functions its connected to is activated.

1. Indicates when you are able to change steering mode.
2. Indicates when wheel axles are lifted.
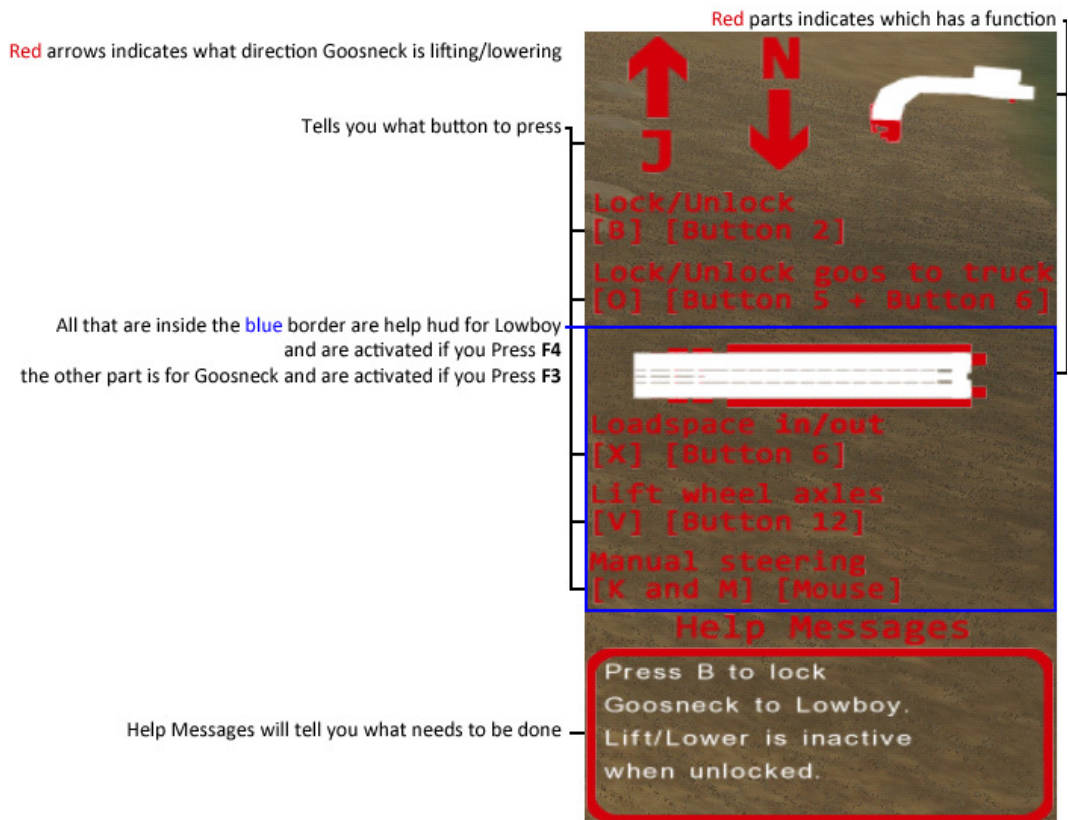

Common features
Turn signal   5.1

Turn direction left: Press **Num pad 1**
Hazard light: Press **Num pad 2**
Turn direction right: Press **Num pad 3**

Help Hud   5.2
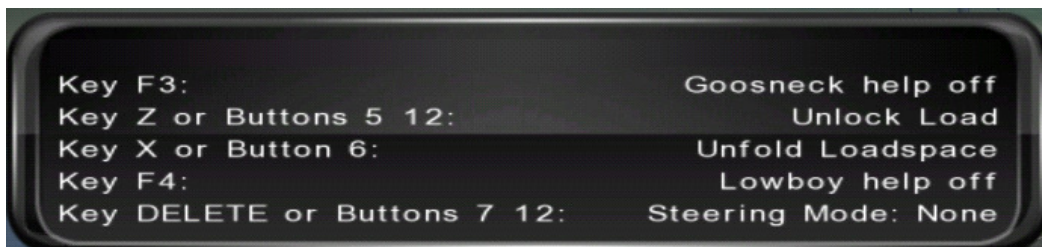

Help hud are splited into two parts, for goosneck, lowboy and lowboy short.
To activated help hud for Goosneck: Press **F3**
To activated help hud for Lowboy (and short): Press **F4**

This hud will show if help hud above is on or off, if Load is locked or unlocked, if loadspace is folded or unfolded and what steering mode you currently have (None, Auto, Manual).
